

ELECTROSTATIC DISINFECTING

Fight Covid-19 with Clorox® Total 360® electrostatic disinfecting system

This proven performer kills colds, flu, norovirus, E. coli and more - 4x faster and with 65% less disinfectant! Using an innovative electrostatic applicator paired with a trusted Clorox cleaning solution, Clorox® Total 360® delivers disinfectant and sanitizer to the front, back and sides of surfaces, disinfecting even the hardest to reach places - with no re-entry time. Bystanders may enter the room immediately after spraying is complete.

Clorox® Total 360® Electrostatic Sprayer delivers more uniform wraparound coverage to the targeted surfaces than current sprayers on the market today, providing better protection from the spread of germs.

Covid-19 can be on any surface. Alcor proudly provides full cleaning teams for our clients, targeting:

Work Force Camps | Buses | Office & Commercial Buildings
Retail Establishments | Schools | Gyms & Recreational Facilities

ELECTROSTATIC TECHNOLOGY

Uses an air compressor for quiet, powerful liquid flow

FORCE STRONGER THAN GRAVITY

LIQUID

An electrode introduces an attractive charge and atomizes the solution. The particles are both attracted to the uniformity coat surface.

Charged particles are attracted to surfaces

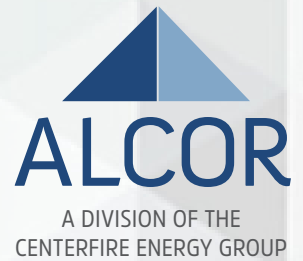

Solution reaches are wraps around surfaces

Each surface is uniformly coated with solution

COMMERCIAL & INDUSTRIAL DUCT CLEANING

Alcor provides specialized, safety-certified industrial duct cleaning services

Duct cleaning is a regular part of preventative maintenance for your work facilities as well as means of reducing energy. The maintenance/cleaning of your ducts contributes to improved air quality, cleanliness, and health. Once cleaned, we spray disinfectant through the ducts which sanitizes the system. At Alcor, we employ staff that adhere to higher standards with the client in mind, as well as the best technology and equipment.

Key Reasons To Have Your Ducts Cleaned

-  Contributes to cleaner, healthier air which will improve your employee's quality of life.
-  Leads to more efficient heating and cooling.
-  It will reduce the necessity to dust and perform menial tasks on a daily basis.
-  Improved airflow leading to better HVAC system performance.
-  Has the potential to reduce utility bills through a reduction of energy.
